Ninth Crew Member Protocol

- A standby is planned on the roster to cover potential ninth crew member scenarios.
- All crew rostered Airport Standby can determine from AIMS whether they are planned to cover overnight's, including the TA operation (APS can be allocated if individual is planned SH, BSBY, RAS, SBYA, SBYB, SBYC, SBYD, SBYE, SBX, SBXL).
- Crew control will not utilise the standby until all West Coast flights have departed. In the event that there is no option but to use that standby (i.e. a flight will be cancelled), crew control will advise IFS management. Authorisation will be given to source a volunteer to cover the West Coast standby until all West Coast flights have departed.
- Crew may bring a TA case through security to the IFS Ops area, subject to normal security restrictions. If a crew member is required for a short haul duty, they can store their case in the IFS ops room or the baggage hall for collection after their duty.
- All efforts will be made to provide the ninth crew member when it is known that the FDP will exceed 13 hours (on all TA flights).
- In the event that the provision of a ninth crew member would cause further delay to the flight due to CBP issues (i.e. the flight has already cleared and CBP has closed), and the CSM or operating Number 1, confirms that the flight will depart without a ninth crew member (after taking account of all points set out in the attached "CSM Guideline re. Ninth Crew Member"), then, the flight will depart with eight crew and the agreed short crew credits will be paid to all eight crew members.
- The standard short crew credit payment is 10 credits per crew member. The short crew credit payment for eight crew operating (in circumstances where a ninth crew member would normally be provided) will be 28 per crew member.
- Aer Lingus is committed to reviewing these arrangements on an on-going basis. The first formal review will take place at the end of mid 2019. The review will establish the number of occasions on which the ninth crew member could not be provided and consider the circumstances pertaining to same. Should there be a high number of occasions where a ninth crew member could not be provided, then the parties will engage in further discussions in respect of additional measures which might be put in place (which may include a revised credit model).

Ninth Crew Member – Cabin Service Manager Guidelines

The following is a guide for CSMs/ Number 1 to follow when communicating with the crew, Duty Ops Manager and Crew Control:

- As soon as it becomes apparent that the max FDP will be exceeded and the flight will require a ninth crew member to be assigned to it, Crew Control and the DOM will commence the process of activating a ninth crew member. The CSM/Number 1 should liaise with the DOM to gather as much information as possible about the delay and update the crew accordingly.
- In the rare event that a ninth crew member is not available, the CSM should advise all crew members of this and provide any available insight in respect of the reason why. The CSM will actively manage the situation and inform the crew that the flight can still depart (legally and under collective agreements) with eight crew and that all crew will receive the agreed credit compensation.

- The CSM should, at all times, ensure that Crew Control and the DOM are provided with relevant information, in a timely manner.

Ninth Crew Member

When a ninth crew member is provided they are surplus to the operating crew.

The CSM should ensure that the ninth crew member is used to take advantage of in-flight rest. Therefore the division of duty and rest between operating cabin crew must be kept in balance and allocated appropriately.

Addendum to the Ninth Crew Member Protocol

Following further discussions in respect of the operation of the Ninth Crew Member Protocol (dated 14 December 2018), it has been agreed between the parties that the following addendum will apply:

If an unknown delay occurs, which extends the max FDP beyond 13 hours and 15 minutes, 28 credits will be paid. If the max FDP is less than 13hours and 15 minutes, 10 credits will be paid.
